

# San Feliciano Medical Centre's Services

## HEALTCARE SERVICES PROVIDED

### Performances in Ordinary Hospitalization and Day Surgery

At San Feliciano Medical Centre, the Ordinary Hospitalizations are in election and can be planned in private regime or in convention with the National Healthcare System.

The Ordinary Hospitalization in election is a not urgent admission, which can be planned and postponed.

The request for hospitalization can be carried out by Primary Care Physician or by Medical Specialist.

The Patient has a first medical consultation with his Medical Centre's chosen Doctor, who considers Patient's real needs and check accomodation availability. Then, the Doctor will order the hospitalization and the Patient will be accomodated for his hospital stay on the scheduled day.

The Day Surgeries are in election too and can be planned in private regime or in convention with the National Healthcare System.

Specifically, the Day Hospital is a programmed one-day surgery, which ends in one day or at most one night. It is used for surgical operations that do not require an ordinary hospitalization.

It provides medical and nursing assistance for a maximum of 24 hours and not exceptable in outpatient basis.

Modalities to access this kind of medical assistance are the same as for planned Ordinary Hospitalizations.

**Medical Director:** Dr. Giorgio Rossi
